

**2nd Latin American Computer
Security Incidents Response Conference
(COLARIS)**

FIRST Technical Colloquium

October 7 to 12, 2006 Rio de Janeiro Brazil

The National Education and Research Network (RNP – Rede Nacional de Ensino e Pesquisa) offers sponsorship quotas for the events ‘FIRST Technical Colloquium’ and ‘2nd Latin American Computer Security Incidents Response Conference (COLARIS)’, which will take place for the first time in Brazil, from October 7 to 12, in the city of Rio de Janeiro (RJ). The events are being organized by RNP in partnership with FIRST (Forum of Incident Response Security Teams), an international organization that gathers security incident response teams (or “CSIRTs” – Computer Security Incident Response Teams).

FIRST Technical Colloquia take place since 1996, exclusively for FIRST members. However, this year it will be provided on a new format, extending its target public to a more broader audience, including non-FIRST members at an adjacent event, COLARIS. This new model was successfully inaugurated last year, in Buenos Aires, Argentina. This is the second time both events are held outside Europe or outside North America.

Approximately 300 attendees are expected, among security specialists and Information Technology (IT) professionals from the entire world: people that, in many cases, have the responsibility to decide on the acquisition of equipment and software for their companies or institutions.

In view of the dynamic nature and vertiginous growth of the security area and the recognized level of the speakers, a record audience is expected. Do not miss out on this opportunity to present your trademark and products to this highly qualified target audience. The sponsorship quotas are limited: guarantee your participation now.

ABOUT THE EVENTS

The events will be held consecutively, from October 7 to 12.

1 **2nd Latin American Forum of Incident Response Security Teams (COLARIS)**

In October 2005, the Argentine Government's CSIRT – ARCERT – organized the 1st COLARIS in Buenos Aires. The success of the event, which gathered participants from various countries, served to consolidate the idea of a new model, which continues this year, under the coordination of CAIS/RNP, the RNP's CSIRT. The 2nd COLARIS is divided into two events:

1a **FIRST TRANSITS Course**

October 7th-8th

The objective of this event is to offer training opportunities in regions where these opportunities are not very common, such as Asia, Latin America and Africa. It is a unique opportunity for participants to understand the requirements for establishing an effective CSIRT, identify the key issues associated to this process and define an action plan to implement a new CSIRT within their organization. Besides other management, technical and operational CSIRT issues associated to the day-to-day routine. The FIRST TRANSITS Course is limited to invitees.

1b **2nd Latin America Security Workshop**

October 9th – 10th

This international security workshop is totally open to the public, and will discuss matters such as incident prevention and handling, vulnerability analysis, forensic and other issues related to computer and network security. Some of the most respected specialists of our time will be present. Registration to the event costs R\$ 50.00. This amount is symbolic, and has the single purpose of guaranteeing the presence of the people that enroll.

2 **FIRST Technical Colloquium**

October 11th-12th

The FIRST Technical Colloquium (TC) is limited to FIRST members and takes place over two days. On the first day, plenary sessions are held to discuss vulnerabilities, incidents, tools and other matters that affect the work of the incident response security teams. The second day is dedicated to the so-called hands-on courses, prominently practical training activities.

SPONSORSHIP BENEFITS

Sponsorship provides a unique opportunity to show your organization's commitment to best practice security. For those in operating systems environment, computer security, networking and telecommunication industries, sponsorship will allow access to a highly influential group of IT professionals that prioritize security in their organizations, as well as computer security incidents response specialists from around the globe. This sponsorship will allow you to:

- Reach an expected target audience of approximately 300 people.
- Promote your organization's products and services
- Gain access to computer security decision-makers from governments, corporations and educational institutions.
- Be recognized as a supporter of FIRST's goals of worldwide coordination and cooperation in security incident handling.
- Demonstrate your organization's commitment to security best practices.

PUBLIC OF THE EVENTS

Representatives from several of the 182 security groups currently affiliated to FIRST, including large corporations and organizations such as Cisco, Microsoft, HP, Siemens, Motorola, Hitachi, Symantec, Skype, US-CERT, CERT/CC, GOVCERT.NL, JPCERT/CC, KRCERT/CC, NCSA, Merrill Lynch, ABN/AMRO, Citigroup, Argentine Government, Mexican Autonomous University, CAIS/RNP (Brazilian academic network), IRIS-CERT (Spanish academic network), CERT.BR, CL-CERT (Chile's CERT), Telmex-Peru, KPN, Deutsche Telekom, among many others, will be present.

THE AUDIENCE INCLUDES

- members of security teams from several organizations;
- policy and decision-makers who operate in the security area;
- senior IT professionals charged with protecting their corporate infrastructure;
- technical staff who determine security product requirements and implement solutions;
- professionals that intend or have already been charged to establish a CSIRT in their respective organizations;
- digital law experts;
- law enforcement staff who are involved in investigating of cyber crimes;
- government representatives responsible for the protection of governmental systems and National Critical Infrastructures; and
- professionals that wish to increase their knowledge in the security area in general.

SPONSORSHIP OPPORTUNITIES

Free attendee passes - International Security Workshop	8	6	4	2

* The sponsor is free to retain the classes for internal usage or to proceed with the drawing to the audience. More information regarding the security courses given by Escola Superior de Redes can be found on www.esr.mp.br

Take advantage of this exclusive opportunity and be internationally recognized as a promoter of the worldwide security culture.

ORGANIZATION

The events are being organized by RNP's Security Incidents Response Assistance Center (CAIS, in Portuguese), in partnership with the Forum of Incident Response Security Teams (FIRST).

RNP was created in 1989 by the Ministry of Science and Technology to promote the use of the Internet in Brazil. Today it operates a nation-wide multi-gigabit infrastructure, connecting more than one million users in approximately 250 educational and research institutions.

During all these years, RNP has counted on the cooperation of several corporations, such as Cisco, Juniper, Extreme, Embratel, Telemar, Compaq, IBM, Global Crossing, Intel, Padtec, Sun and many others. They have been fundamental in the promotion of the innovative use of advanced networks in Brazil and in the diffusion of modern information technology, whether by loaning equipment, sharing technology or sponsoring events promoted by RNP.

If your company is one of the RNP's traditional partners, take this extra opportunity to consolidate your image with information security specialists. If your company has never been our partner, come join this team of winners. Do not miss this opportunity!

ABOUT CAIS

CAIS was created in 1997 with the mission of acting in the detection, solution and prevention of security events in the Brazilian academic network. In addition to elaborating, promoting and disseminating security best practices among its constituency. The team also participates in national and international forums and conferences, and cooperates with other CSIRTs around the world.

CAIS has been affiliated to FIRST since September 2001 and is part of the organization Board since 2002, which evidences the prominent role performed by the Brazilian group in the international scope.

ABOUT FIRST

The Forum of Incident Response and Security Teams (FIRST) is the premier organization and recognized global leader in incident response. The organization goals include fostering cooperation and coordination in incident prevention, stimulating rapid reaction to incidents, and promoting information sharing among members and the community at large. FIRST brings together a variety of computer security incident response teams from government, commercial, and educational organizations - today gathers 182 security teams from more than 30 countries.
